

Cheat Sheet...

...Nasty Nails

1

Start by wrapping the plastic around the tube form and securing with thread.

2

Immerse the plastic in boiling water & cool it in cold water.

3

Remove the plastic once cool, and cut into strips. Trace the real nail outline.

4

Shape with scissors, and emery or sanding pad or use 'wet or dry' paper.

5

Score some splits into the end from the inside of the nail using a craft knife.

6

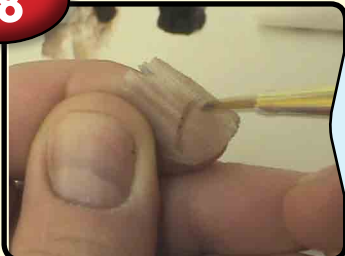

Sand the surface of the nail using a coarse grit sand paper.

7

Using acrylic inks or paints, apply washes of colour and allow to dry.

8

Once the nail is dry, apply another wash to create the half-moon shape.

9

Apply the pre-cut double sided tape or toupee tape to a clean nail.

10

Attach nails and add makeup, blood or any gore effects. Happy trails!
